The GDP growth remained subdued during the financial year though expected to have bottomed out.

The long term fundamentals of the Indian economy continue to be strong though in many sectors the margins have fallen. The growth of the economy is primarily due to domestic consumption which has shown signs of flat growth in few sectors.

Due to instability and uncertainty in financial sector with squeezing of Margins, the outlook for the first half of the financial year does not look bright but things may improve in the later half of financial year with surge in demand and prospects of good Monsoon provided political stability remains.
